

Amendments to the Specification:

Please amended the paragraph starting on page 2, line 8 of the specification as follows:

In order to realize the object, the invention is to provide a muffler which comprises a casing within which is a gas inlet, a gas chamber and a gas outlet, a throttling device which is located in gas flow route and controlled by the pressure ~~self-energy~~ of gas flow. The throttling device controlled by pressure ~~self-energy~~ of gas flow is a pressure reducing valves structure. The pressure reducing valves structure includes an adjusting device and a throttling device. The adjusting device comprises a manual adjusting device, a spring, an energy sensor member and a connection lever which are connected in series. The throttling device comprises an open and close member and a fixture.
